

# House Preparation: For Spider and Fly control of your home.

## THANK YOU FOR CHOOSING SPIDERBAN.

**SPIDERBAN NC Ltd.** is a registered company and has been operating in Canterbury since 1995 and extended now to most of the South Island as **Spiderban Ltd.** We are dedicated to giving you the best service and safety we possibly can.

These are important things for you to do to protect you, your family and your pets. These are recommendations from the Manufacturers and are to help protect you from any skin irritation or allergies from the product.

If your house is quite dirty as in a new subdivision with building dirt or older with lots of webs, it is good to have it washed before we spray. This will make your house look clean for much longer as there will be no more webs. Please don't wash your windows until we have been, this can be done 2 days afterwards to allow spiders and insects to pick up the product. And we prefer to use a mop and squeegee and **DON'T** Wash the **FRAMES**. Water brushes are a bad choice.

**PREGNANCY:** If there is someone in the house that is pregnant, the house shouldn't be sprayed until the pregnancy is at 14 weeks. After that time, we recommend the chairs they favour are covered with an old sheet or towels.

**KITCHEN:** Cover or put away, drink bottles, jug and toaster, paper towels, tissues, chopping boards, coffee makers, salt pigs, coffee, sugar, knife blocks, fruit bowls, medicines, mobile telephones and cell phones, remotes, oil, spice, and cooking utensils etc. Bench surfaces and food preparation areas can be washed.

**LOUNGE:** Please cover TV screens, remote controls, computer screen, mouse and keyboard.

**BATHROOM:** Toilet tissue away, towels, cover weighing scales, tooth brushes, make up, soap, shampoo and body scrubbers brushes etc, can all be put in bath or sink and covered with a used towel that is going to be washed.

***P T O...***

**BEDROOMS:** We prefer the entire bed to be covered with a sheet. Put away any medicines, and if you have a nebulizer under the bed. Make up, shoes, TV screens, necklaces, cameras, jewellery, should all be covered. Dressing gowns removed from behind doors. We do not spray into wardrobes. If you want it done you will have to cover the clothing and shoes accordingly or lay them onto a bed and cover. Easiest way is to put everything on the bed and cover the bed with a sheet.

**CHILDRENS BEDROOMS:** Cots and bassinets need to be completely covered to the floor with a sheet. The children toys can be put into cot or onto bed before covering any nappy changing area needs to be covered

**PETS:** Birds, cats, and dogs must be out of the house fish bowls must be covered and the air pump turned off on indoor aquariums. Outdoor ponds need to be covered if they are close to the house. Dogs & Cats water & food bowls away.

**OUTSIDE:** The day we come please have all windows shut and NO washing on the clothesline. Please cover any butterfly bushes.

*Our Technician will walk through your home and check before we proceed.*

**YOU MUST BE OUT OF THE HOUSE FOR 3-4 HOURS AND ON YOUR RETURN PLEASE OPEN THE HOUSE UP, AS MANY DOORS AND WINDOWS AS YOU CAN. WE WOULD LIKE THERE TO BE AIR MOVEMENT FOR 20 MIN TO 30 MIN. IF IT IS A STILL DAY AND THERE IS NO AIR MOVEMENT, PLEASE ALLOW HOUSE TO BE OPEN FOR 45 TO 60 MIN. DO NOT TAKE CHILDREN INSIDE UNTILL AIRING TIME IS COMPLETED. All THE SHEETS AND TOWELS YOU USE CAN BE WASHED IN A LOAD TOGETHER, SEPARATE FROM OTHER WASHING.**

**Please Tick off each box and leave this letter out for your technician.**
